

An easy step into high-quality laboratory work:

LT-SYS® Diagnostics.

Labor + Technik

EBERHARD LEHMANN GmbH

Diagnostics and Labware

Consulting · Training · Customer Support

Company **LABOR + TECHNIK Eberhard Lehmann** (Laboratory and Technique) was established in 1976 by Eberhard Lehmann, former vice-president and sales-manager of Dr. Bruno Lange GmbH, Berlin. Today, **LABOR + TECHNIK** is one of the well-known and leading distributors of diagnostics in Germany and Austria and focuses on best possible customers-service and product quality, offering these at competitive prices.

LABOR + TECHNIK is distributing mainly high-quality in-vitro-diagnostics to customers in Germany, Austria and Switzerland, as well as to other countries. An especially developed program of diagnostics is offered under our brandname **LT-SYS®** (LABOR+TECHNIK-SYSTEM).

For the application on photometers for manual use we offer high quality reagents also in small reagent kits with long expiration dates. Together with our approved procedure sheets with easy-to-use working instructions for manual use also a smaller laboratory can find the solutions for its special demands. For analyzer systems we deliver special diagnostic kits.

LABOR + TECHNIK is offering customers in human and veterinary labs, in small and big institutions, advice, special instructions and service.

Our modern lab is the background for a high-grade service quality and is also a practical training center for customers in Germany. It offers technical service for photometers and other laboratory equipments. Furthermore, we offer service through visits of qualified staff or by telephone-service.

LABOR + TECHNIK's comprehensively arranged stock with big cooling rooms makes sure that our customers receive the needed diagnostics at once ex stock by a rapid dispatch system.

As a matter of course our products are CE-confirmed.

HAEMA-Quick-Stain/Diff-Quick **LT-SYS®**

(Made in Germany) inspires customers throughout the world by its brilliant colours.
